NIVISIO

Where your words take form

A local-first PDF library and notebook

Read, annotate, sketch and keep notes — offline on your device.

- Annotate PDFs with pen, pencil, marker, tape and shapes.
- Insert grid note pages between PDF pages.
- Use ruler, set square and protractor guides with snapping.
- Export a flattened PDF with every mark included.
- Bilingual Persian/English interface, no account or backend.

Open this sample in nivisio to try the tools.

Everything in this guide is local and editable.

Read and annotate

Use the toolbar to highlight text, write with a pen or marker, cover content with tape, erase marks or lasso-select several marks at once.

Select a mark in the Marks panel to recolor it, change its category, thickness, opacity or rotation.

Notes and grids

Add standalone notes with A4, A5, B5, Letter, Square or custom page sizes.

Each page can use lined, grid, dotted, graph, Cornell, blank, isometric, true 30–60 or circular paper.

Set page size from the document editor or the reader Info panel.

Guide, snap and export

Place a ruler, set square or protractor and draw with guide-edge snapping.

Snap is grid-aware: ruled paper snaps vertically, graph paper in both axes, 30–60 on its triangular lattice.

Export a flattened PDF with notes, shapes, images, charts, highlights and handwriting.
